

The PREP Symposium program promises to be one of the strongest in recent years! See the full Scientific Program and the Program-at-a-Glance, posted at prepsymposium.org.

Solve Today's Practical Problems and Prepare for the Future of Prep Chromatography by attending the PREP 2009 Symposium on July 19-22 in Philadelphia, PA, USA.

- Find current solutions to practical chromatographic separations.
- Optimize chromatography processes for the best economic production.
- Discuss current and future challenges and opportunities for manufactures as well as media and equipment suppliers.
- Get close-up views of the latest products and technologies that are driving the pace of innovation in prep chromatography.
- Interact with world leading scientists and engineers in all aspects of preparative and process liquid chromatography.

The PREP 2009 program will offer scientists and engineers concerned with chromatographic separations the opportunity to present, discuss, and explore the latest advances in preparative chromatographic separations, along with ample opportunities for professional training. The Symposium brings together industry, equipment and media vendors, academia and government to share the latest advances in the field through lectures, poster sessions, vendor workshops, panel discussion sessions, and an extensive vendor exhibit.

All-day Sunday Workshops

Workshop 1 – Preparative Chromatography for Small Molecules

Workshop 2 – Preparative Chromatography for Biomolecules

Two all-day workshop programs will provide essential training to arrive at practical solutions to today's chromatography problems and a critical foundation to address future developments. A joint session addressing regulatory and product quality aspects will facilitate applications in pharmaceutical manufacturing. Certificates of completion that can be filed with your company's management or Quality Assurance Group will be provided as a validation of the training you received.

Free Vendor Workshops on Monday

Bio-Rad Laboratories

Novasep

Pall Life Sciences

PIC Solution

Free Vendor Workshops on Tuesday

Asahi Kasei TechniKrom

Chiral Technologies

LEWA

MIP Technologies

Tarpon Biosystems

Free Vendor Workshops on Wednesday

BIA Separations

Preliminary List of Exhibitors and Sponsors

AkzoNobel, Asahi Kasei TechniKrom, BIA Separations, Bio-Rad Laboratories, Centocor, Chiral Technologies, Essential Life Solutions, Genentech, ITOCHU Chemicals America, LCGC, LEWA, Mallinckrodt Baker, MedImmune, MIP Technologies, NovaSep, Pall Life Sciences, PDR-Chiral, Pfizer, PIC Solution, Scientific Systems, Tarpon Biosystems, Varian, Wyeth, YMC America

Register by May 18 to receive a discount on the meeting registration fee.

Make Your Hotel Reservation soon while there are discounted rooms available.
