$\frac{d\sigma}{d\Omega d\nu}$ (nb/sr*GeV)

$v$ (GeV)

Al

Dai:2018gch
The diagram shows the variation of $d\sigma/d\Omega$ with $v$ (GeV) for Al. 

The data points are plotted with error bars. The peak occurs around $v = 0.2$ GeV, with values approaching $140,000$ (nb/sr*GeV) for $d\sigma/d\Omega$. 

The legend indicates that the data is from Dai:2018xhi.
