

Updating i>clicker Using Web Update

Web Update helps you keep i>clicker and i>grader up-to-date. Web Update checks your version of i>clicker and i>grader against the latest versions available for download. If updates are available, Web Update will help you download and install the updates.

To run Web Update, double-click the **WebUpdate** icon and follow the on-screen instructions.

IMPORTANT: WebUpdate requires Microsoft .NET Framework Version 2.0 or later installed on your PC.

If you receive an error message when running WebUpdate you can download and install .NET Framework Version 2.0 from the following link.

<http://www.microsoft.com/downloads/details.aspx?FamilyID=0856EACB-4362-4B0D-8EDD-AAB15C5E04F5&displaylang=en>

As an alternative to running Web Update, you can always download the latest version of i>clicker from the Downloads page at www.iclicker.com.
